

## METHODIST DIVINES.

Meeting Largely Attended—Fine Reports From Churches.

Twentieth Century Thank Offering—Dr. Smith Reported \$1,300,000 of the Amount in Sight—Between \$80,000 and \$90,000 Already Subscribed by the Virginia Conference.

The Methodist Preachers convened in regular weekly meeting at 10:30 a. m. Monday, with the president, Rev. R. M. Chandler, in the chair. Prayer was made by Rev. Dr. W. E. Jenkins, presiding elder of the Norfolk and Eastern Shore district.

The call of the churches was taken up and the following reported: Oakette—Rev. J. W. Baker reported the usual services in the morning; had a very large congregation at Gilmerston in the afternoon and interesting exercises.

Seamen's Bethel—Rev. J. B. Merritt had an interesting day Sunday and good attendance on all the services. Rev. J. W. Crider conducted services at the navy yard Sunday afternoon, and had an interesting and profitable service.

Owens Memorial—Rev. R. T. Waterfield preached morning and night to good congregations, and at Brighton Mission in the afternoon, where a glorious revival has been in progress. He preached eleven conversions. He organized a church there with twenty-two members.

Port Norfolk—Rev. J. P. Carey reported a fine Sunday school and thirty new scholars; conducted the Epworth League in the afternoon. Rev. W. C. Vaden, presiding elder, preached at night.

Epworth—Dr. Smith had a good congregation in the morning. He presented the Twentieth Century fund, and the response was very gratifying. Epworth will contribute \$1,500 to the cause.

Rev. J. T. Mastin preached morning and night at Chestnut Street, Berkeley, and had a large congregation. He preached Sunday school in the afternoon. He has purchased two lots and is arranging to erect a mission Sunday School building.

Huntersville—Rev. Dr. Jenkins preached in the morning, and the pastor, Rev. Daniel T. Merritt, preached at night to a large congregation. Held Sunday school at Park Place Mission in the afternoon and had three additions.

Central—Rev. R. F. Beadles preached to large congregations; received three on profession of faith and had one conversion at night. He preached at Central Mission in the afternoon.

South Princess Anne—Rev. J. W. Nicholson reported unusually large congregations at Charity and Beach Grove Churches Sunday.

Lambert's Point—Good Sunday school; large congregation at 11 a. m.; a very spiritual service; three additions by certificate; one conversion. A Sunday school rally services at 4: a large turnout and interesting exercises. At night Mr. Carroll had the largest congregation during the year.

Trinity—Rev. George Wesley Jones had the usual services Sunday and large congregations.

Rev. J. N. Latham reported pleasant services at Park View Sunday. Rev. W. C. Vaden preached in the morning and the pastor at night.

Liberty Street, South Norfolk—Rev. Paul Bradley had an excellent Sunday school. It being nearly an overflow. He received eight new scholars. Had large congregations morning and night and received six new members to the church by certificate.

Rev. R. M. Chandler reported a steady increase in the congregations at Centenary. Had a fine Sunday school. He reported all of his conference collections in sight.

McKendree—Rev. W. R. Proctor had a good day Sunday and pleasant services. He preached morning and night and at the Mission in the afternoon.

Rev. Mr. Jenkins preached at Huntersville Sunday morning for Rev. Graham H. L. Latham, and at Leakes Memorial night. He said that the reports from the Norfolk and Eastern Shore districts to conference will be gratifying; that nearly every charge on the district had been blessed with a revival. He said that he was unable to report what the district would do for the Twentieth Century fund.

At Denby's and Bethel Churches Rev. W. R. Crowder had good Sunday schools and large congregations. At the former church the congregation voted unanimously for his return next year.

Wright Memorial—Rev. George E. Booker had a Sunday school rally in the morning and preached to a large congregation at night.

Rev. W. C. Vaden reported that he preached twice Sunday, in the morning at Port Norfolk, and at Park View, Portsmouth, at night.

Rev. S. C. Hatcher had a fine Sunday school at Queen Street and a large congregation in the morning. Rev. W. B. Oney, of Bridgewater, Va., a member of the Lutheran Synod, preached to the edification of all who heard him. The pastor preached at night to an unusually large congregation. Mr. Hatcher reported a fine revival spirit pervading his congregation.

Monumental—Rev. E. H. Rawlings had large congregations to hear him. He had a special revival service at night. There were two conversions and two re-conversions.

TWENTIETH CENTURY FUND. The matter of the Twentieth Century fund offering was discussed, and information of much interest was given by Dr. Smith, who is a member of that committee. He said that the \$1,500,000 to be raised by the M. E. Church South there was already \$1,300,000 of that amount in sight, and that of the \$150,000 apportioned to the Virginia Conference between \$50,000 and \$90,000 already had been contributed. Dr. Jenkins said that the church at Salisbury, Md., would contribute \$1,000 to the fund. It was the consensus of opinion that the entire amount will be raised early after the adjournment of the conference, as soon as the principal churches, who have not as yet entered the list, will give the balance needed to complete the subscription.

CONFERENCE ENTERTAINMENT. Rev. S. C. Hatcher, secretary of the Conference Entertainment Committee, reported that about seventy-four more homes were needed for delegates, which he hoped to be able to secure this week. Several new homes were added to the list before the meeting adjourned.

PERFECTLY HEALTHY. People have pure, rich, warm, nourishing blood, good appetite and good digestion. Hood's Sarsaparilla gives these, and thus it makes people healthy and keeps them so. Get only Hood's.

Stick headache is cured by Hood's Pills.

## PRINCIPLES OF CHRISTIAN SCIENCE.

Continued from Page 5.

proved its almightiness to destroy the chains of evil. Its law of health and harmony superior to earth's discords. Life and destroyer of death, Love and its affluence more than meeting human needs. When he fed the multitude the fragments that remained proved that Mind was truly a multi-placed being, who fed the hungry, whom he fed from the banquet of Love.

Jesus viewed man from the standpoint of Soul, not sense; of Spirit, not matter, and that is the secret of Jesus and of Christian Science. He was the faithful and true witness of Good.

In these metaphysics the Jesus consciousness is that which recognizes the Fatherhood of Spirit and the divine Sonship, denies the human selfhood, matter and its conditions, and the temporal falsities of the human mind, which vanish before the enlightened understanding.

Christian Science to-day in "Science and Health with Key to the Scriptures" gives to us the absolute Science of Being as Jesus lived and demonstrated it; for the first time the human or mortal mind, in its full and final analysis, is given to humanity, and its illusions are seen to be the dead sea fruit of the tree of the knowledge of Good and evil—the pantheism that would de throne Deity, it meets from Christian Science the verdict of Jesus, "It is a lie, and a far from the beginning, and the Truth never in a mortal mind. Good and evil were never in a mortal mind. He is the only law of Being. Good is always perfect and harmonious, and man never fell from Omnipotence. John said, 'Now are we the sons of God'—Good.

One who will say, some one *always* does say, if man was always perfect in God, how did he ever fall into this discordant material condition? It would be as if some one would ask an astronomer, if the earth now revolves in her orbit around the sun, did it ever happen that she used to be flat and stationary? The astronomer will say, "No, it never was so, that was only a false sense of it. In the same way we have judged unrighteous judgment of man, because we have judged from the 'seeing of the eye' instead of seeing 'not of the flesh,' but after the Spirit. To reverse this false estimate of man, and see with the eyes of divine Love, and Love's image and likeness is the only reality of existence, to see as God sees, to Love as Love loves, is to realize of Love and fill it with the radiance of Love in Life. It was this unselfed sense of Love that Jesus his dominion over sin and death, and this reflection of Love will give it to us. This Law of Love is God's law of Life and health to His children, for He is our health, 'the health of our countenance, and our God.' He is near every one of us, for He is our Life, our Mind, Paul said, 'we have the Christ within us.' There is no other real Mind, and when we accept it fully, sin and death will be unknown. Sin alone brings death and disease, the Bible teaches; and the destruction of sin means Life and blessedness in immortality.

We speak with pride and satisfaction of the wonders of the closing Century and the beginning of the new. Each day new marvels greet us, as we see the material out of the material; the immaterial; the ray, the wireless telegraphy, the constantly ascending evolution of mortal mind out of its old boundaries, reaching out toward the scientific declaration that 'There is no Life, Truth, Substance or Intelligence in matter. All is infinite Mind and its infinite manifestation. Science and Health, p. 463. This declaration Jesus proved. Prof. Langley, the distinguished Scientist, now tells us that the color is not in the rose, but in us, in our thought. But the real glory that has made all the others possible is this, that in this age has been found one consciousness so clean, so pure from the dross of materialism that it can witness the Science of Soul, which is, and always was the All-Science of celestial Being has been revealed to us.

Even Mrs. Eddy's students, who lovingly follow her leadership, can only faintly grasp the fulness of her lifetime mission,—but each day unfolds to us more and more the inestimable value of her discovery and her work. A watchful Shepherd over nearly 500 Christian Science churches and four thousand students she stands, a faithful and patient sentinel, keeping guard over a world. Two million people healed through the sweet ministry of her work, and this healing is not only physical, but it is the beginning of spiritual regeneration that culminates in the 'freedom of the sons of God.' Can words compass the extent of her beneficence, or the far-reaching influence of so sublime and selfless a life!

As we see this we feel that we owe no apology to the world for the tender love, gratitude, and ever-increasing admiration that we feel for her, for such lofty and spiritual attainments as she has reached. In the words of England's Christian poet, Tennyson, 'We needs must love the highest best.'

The world's greatest humanitarian movement, and its greatest moral reform movement are organized and led by noble, consecrated Christian women. It would seem strange if this vast spiritual movement, which really includes them all, should not be also led by a woman. None other than the one through whom it came could lead it with that matchless wisdom that characterizes it.

How long has the hope of Christian unity been deferred? Yet in the Christian Science organization each Sunday every Christian Science congregation in the world, from Australia to Norway, from California to Japan, under the same lesson sermon, with the same words from the Bible and the same correlated selections from Science and Health. This absolute unity of thought, uniting in one Mind, one family, all the churches, is even now carrying the earth with the rhythmic joy of peace on earth—good will to men; for the promise is that 'our words shall not return unto us void, but they shall accomplish that whereunto they are sent.'

Christian Science is here calling all into this same unity,—into the one Mind that was in Christ Jesus, including all nations, climes, interests, all health, holiness, harmony and life.

That Mind is here, now, everywhere,—it includes all in the infinite Love that encompasses all things. The atmosphere of divine Intelligence is the true air, in which 'we live, and move, and breathe,' it reveals what 'eye hath not entered, nor ear heard, beyond what hath entered into the heart of man to conceive.'

Immortal Love changeth not. The music of the spheres still chants the eternal harmony of Being, as when the morning stars sang together, and the sons of God shouted for joy. We only need to awake out of the material dream, and be 'satisfied with His likeness.'

SUE HARPER MIMS, C. S. B.

## PERSONAL AND PERSONAL.

Continued from Page 3.

ous banquet lamps shed a radiance o'er the scene. Promptly at the hour named the wedding party entered the parlors to the sweet strains of the wedding march performed on the piano by Miss Nora Twiford, where the bride and groom, who was attended by his best man, where the marriage rite was impressively performed by Rev. Edward Mack, D. D., of the First Presbyterian Church.

The bride looked the very picture of beauty in her elegant costume of white organdie, trimmed in lace and ribbon. She carried bride roses. Miss Gertrude Thummler filled the role as maid of honor. She wore a dress similar to the bride's and carried bride roses. The bridesmaids were Misses Nellie Trotter and Lillie Williams, cousins of the bride. They were attired in blue organdie and carried pink carnations.

The groom and his best man, Mr. W. Harry Norris, appeared in conventional black.

At the conclusion of the nuptials an elegant reception was held, which was much enjoyed by the bride and groom and a select company of invited guests. The bride was the recipient of a large number of beautiful, useful and costly gifts.

Mr. and Mrs. Farleigh will be at home to their friends on Central avenue, Huntersville, to-day.

## MONTHLY MEETING.

OF BRAMBLETON LOCAL BOARD OF IMPROVEMENT—OTHER ITEMS.

The regular monthly meeting of the Local Board of Improvement was held at 7:30 o'clock last night. Present: Mr. C. J. Jones, chairman, and the following members: Messrs. Bunting, East, Ferabee, Hampshire, Reid and Sterling.

Mr. C. W. Calk was granted the privilege of the floor. He requested permission of the board to connect his houses on Charles street with the sewer, with one pipe, in order to save the necessary expense. He said he was willing to extend a four-inch pipe into the rear of his lots if necessary. He also asked the board to change the name of the street, as there was another Charles street in the city, and the two streets bearing the same name created confusion. The matter of connecting his houses in the manner requested was referred to the Sewer Committee with power to act.

In the matter of changing the name of the street, the board informed him that it would be necessary to get a petition signed by all the residents and property owners on the street.

Mr. Reed, chairman of the Street Committee, reported the street in good condition. The report was received and filed.

The recommendation of the City Engineer that Mr. Denby be allowed \$30 for extra work done on Kelly avenue and Spring street, caused by a change in the profile, was approved.

The report of Street Inspector Stokes of work done on the streets since the last meeting was received and filed.

Mr. Ferabee, from the School Committee, reported that since the last regular meeting School No. 1 had been opened, but that the work on the building was not entirely finished, but it would be completed in a short time.

An application was received from Mr. E. P. Janitor asking for reappointment as janitor of the schools. The board unanimously re-elected him to the position.

In the matter of furnishing the schools with needed furniture the committee reported progress.

A communication was received from the police of the ward asking to be relieved of the duty of calling the Norfolk police force at night. It was learned that about three of the force of the ward have to wake about twenty-one men, and it greatly impeded them in the discharge of their duties.

The Police Committee of the ward was instructed to take the matter up and see if some relief cannot be secured for the police, as it is considered a hardship upon them.

The secretary was instructed to write the City Engineer and request him to inform the City Gas Light Company that the board will not permit any tunneling under the asphalt pavement on Kelly avenue, or it is laid, for the purpose of running gas mains.

A petition was received from residents and property owners on Lovitt street asking for an additional electric light to be placed on that avenue some where between Park and Clay avenues. Mr. Ferabee said that another light is badly needed at some point on the street between the points designated, on account of the dense shade trees that line that thoroughfare. The matter, after some discussion, was referred to the Light Committee to investigate and report back to the board.

On motion of Mr. Hampshire, the Committee on Lights was authorized to take up the question of the cost of placing the electric lights in the centre of the streets and report back to the board.

The committee from the School Board in regard to the early erection of the annex to School No. 2 in order to accommodate the large number of children in the ward who are without school facilities, was received and filed. Properly approved bills were allowed.

## ITEMS IN BRIEF.

A called meeting of the Ladies' Enterprise Society of McKendree Church will be held at 4 o'clock this afternoon. Business of importance.

Miss Blanche P. Breeden, of Granville avenue, has gone to Washington, D. C., to visit relatives, accompanied by her grandfather, Mr. John J. Clark, of Brambleton avenue.

Mr. J. S. Hall, formerly with Williams, Martin & Gray, wholesale druggists, has taken the brick store, corner of Harrison and Reservoir avenues, and will open it with a new stock of drugs and toilet articles on November 1st. The store has been newly painted and looks very attractive.

Mystic Chain—Ladies Social. On Friday night Norfolk Lodge No. 125, order of the Mystic Chain, will give a ladies' social in Elks' Hall. A fine musical and literary program will be presented and refreshments will be served. The committees having the matter in charge propose making the entertainment a grand affair and has sent out over 500 invitations.

Second Presbyterian Church. Rev. W. M. Junkin, missionary to Korea, will deliver an address at the Second Presbyterian Church at 7:30 o'clock to-night. Mr. Junkin is an earnest and interesting speaker and the subject on which he is to speak to-night will make the occasion one of great interest.

## SEARCHING RUINS FOR DEAD BODIES.

Continued from Page 1.

and at 10 o'clock to-night brought to light a portion of a woman's foot and the top of a crushed-in skull. The skull had long brown hair attached and is supposedly that of a woman. During to-day superintendent Dooner had a very large force of men working as hard as possible tearing down piles of debris and removing it. The fire burned all day, and toward night was practically to the end of the mass of debris of Washington and Warren streets. The fire rums back for some distance and is burning fiercely.

DIFFICULTIES IN THE WAY. There were no new workmen at work to-night. Superintendent Dooner was using the same force that he had had all day, but will get a largely increased force to-morrow. The reason assigned for having no new men is that the ruins are so hot that few can get at them and the men have to work at outside walls and debris in the streets.

There has been found to be much difficulty in getting contractors' carts in Warren and Greenwich streets. What space is not used by the engines is nearly all taken up with piles of debris and only one cart can back in at a time, thus allowing only one load to be removed. At the Washington street end more carts can be utilized and the work is progressing much more rapidly.

Deputy Commissioner of Sewers Donohue, with two inspectors from his department, was at the scene of the fire last night. It had been feared that the sewers would become clogged with debris and cause the water to form in stagnant ponds around the ruins. The inspectors examined the sewers and said that they are remarkably clear from debris and the expectation of a few 'elbows' which were clogged, were all right.

LOSS OF LIFE EXAGGERATED. One hundred and fifty patrolmen, under Captain Westervelt and Inspector Brooks, were stationed at the ruins at 6 o'clock, relieving the day force. Both Inspector Brooks and Captain Westervelt were slightly over the reported large loss of life. They both said they did not expect more than four or five bodies would be found in the ruins.

Playing on the still burning ruins were four engines, and they kept their streams going continually. A revised list made up to ten o'clock to-night shows 31 persons still missing.

ANOTHER BODY FOUND. At 10:20 o'clock a portion of a human trunk, probably the abdomen, was dug out, and a little later a brown canvass coat. There was nothing in the pockets but four quill tooth-picks. Still later the firemen found another portion of a skull and a portion of a human back.

Dr. Conner, of the Health Department, who examined the remains, said they were probably all from the same person, as were the foot and portion of a skull found earlier.

The remains were all found in the Tarrant building.

TARRANT & CO.'S LOSS. President Thomas F. Main, of the Tarrant & Co., said to-day: "In our own stock we had not either or at most not more than a few pounds; we had no benzine and no colodion. When we needed any of these articles to fill orders we bought it from dealers. We had very little alcohol in stock, notwithstanding the fact that we use a considerable quantity of it in making our perfumes."

We had absolutely no nitroglycerine and no gun powder. "All our employees and two have been accounted for. We employed 20 men and 15 women. William Moorehouse, a shipping clerk, and a boy was employed on an upper floor, are missing. Two of our men say they saw Moorehouse in the street after the last explosion. Some one said the boy had been to the cashier to get car fare to go on an errand a short time before the fire. We fear he was lost in the building."

Mr. Main said that Tarrant & Company stored on the third and fourth floors large amounts of stuff for other drug concerns. "Among this," said Mr. Main, "was much chloride of potash, and this may have caused the explosions. I am inclined to think it did. While chloride of potash is not explosive in itself, it is explosive when connected by fire or other means with other drugs or acids, and it is on this very theory that the experts are now working to determine just how the explosion might have been caused."

That is dyspepsia. It makes life miserable. Its sufferers eat not because they WANT to—but simply because they MUST.

They complain of a bad taste in the mouth, a tenderness at the pit of the stomach, a feeling of puffy fullness, headache, heartburn and what not.

Hood's Sarsaparilla cured Joseph F. Laine, Flanagan, Ky., who writes: "I was troubled with dyspepsia for a number of years and took medicine that did me no good. I was advised by friends to try Hood's Sarsaparilla which I did and it put my bowels in perfect condition, gave me strength and energy and made me feel like a new person."

Promises to cure and keeps the promise. Beware of substitutes. Buy Hood's and only Hood's.
